Costs are valid for 10 days from the official date of estimate. 12.12.2023

PROJECT DETAILS FOLLOW

1. DESIGN

The designers will incorporate elements such as the company's logo and colors to help strengthen the identity of the company on the website. The designers will create a minimum of three website mockups for the website that include the home page and at least one interior page. The designer will make any and all revisions requested by the client. Once the mockup is approved by the client, the designer will send the assets to the developer for actual coding/construction of the functioning website.

2. DEVELOPMENT

The project developer will take all of the individual graphic elements from the mockups and use them to create the actual, functional site. This is typically done by first developing the home page, followed by a "shell" for the interior pages. The shell serves as a template for the content pages of the site, as it contains the main navigational structure for the web site. Elements such as the CMS, interactive contact forms, and Search features are implemented and made functional during this phase, as well. The developer will write valid HTML / CSS code that complies with current web standards, maximizing functionality, as well as accessibility for as large an audience as possible.

4. PAGE STYLING/MODIFICATIONS

We will use existing content and any other text or imagery content that the client can provide, and style each page to be consistent in look and feel.

INITIAL SEO

To get site noticed and ranking on all major Search Engines like GOOGLE, BING, and YAHOO. The basic package includes:

- Google Analytics Integration: So you see the important visitor stats on your site
- Keyword Research & Meta Tags (Title, H1, Description) Optimization.
- Robots.txt file integration: Makes it easier for "bots" to search/cache your site.
- XML Site Map Creation: So the search engines find all your pages correctly.
- Verification of your site with Google Webmaster Tools

Initial SEO/SEM cost: **No Charge**

TESTING/DELIVERY

The site will be thoroughly tested (such as the complete functionality of forms or other scripts, as well as testing for last minute compatibility issues - viewing differences between different web browsers, ensuring that the website is optimized to be viewed properly in the most recent browser versions/mobile devices – referred to as responsive design. The digital team will check to be sure that all of the code written for the website validates. Valid code means that the sites meet the current web development standards – this is helpful when checking for issues such as cross-browser compatibility as mentioned above.

Once the client has given final approval, we will use the FTP (File Transfer Protocol) program to upload the website files to the server.

Testing & Delivery Cost: **No charge**

ONGOING SITE MAINTENANCE

Content management system updates, javascript updates, server maintenance and upgrades, secure certificate renewals, LAMP stack updates and upgrades. (*Does not include actual content additions.*)

Cost to client: **No charge**

EXTRAS:

PHOTOGRAPHY

Our photographer will take multiple headshots and poses of the client in our Studio Cyclorama, and will provide a Lightbox link for selection approval

COPYWRITING

Our copywriter will work with the client to write compelling SEO friendly copy for the 5 pages of the website.

VIDEO SHOOT

Our Social Media videographer and one assistant will come to the client location and shoot interviews/B-Roll footage in a one day shoot, for use in Social Media and the website.

*This site will be SEO optimized and ADA compliant upon release of the site to the client. Studio Center cannot be held liable for any added content, past the point of turnover to the client, that is not ADA compliant or SEO optimized. Please contact Studio Center for assistance as needed. We would be happy to help.

THANK YOU!
